

DR. EVAN LYON

Chief Integrated Health Officer at Heartland Alliance, and teaches Health and Human Rights and Health Care and the Limits of State Action..

DR. SOLA OLOPADE

Dr. Olopade's research is focused on asthma management practices, particularly the relationship between environmental and genetic factors in developing countries.

HELEN WEI

Medical Student of Bridgeport Free Clinic. The clinic provides important medical care to the community of Bridgeport such as screening patients for conditions and helping enroll patients in insurance programs.

GLOBAL GETDOWN

This quarter we hosted our annual banquet to hear from campus and community leaders about their roles in public health work. This year's theme was "The Reach and Importance of Interdisciplinary Public Health Work," reflecting how new avenues of healthcare work draw from multiple disciplines.

ANDREW REILLY

Finance and Operations Associate at NowPow. NowPow is a multi-sided technology that connects people to community resources, addressing chronic health and social conditions..

DR. RENSLow SHERER

His research focuses on HIV/AIDS prevention in sub-Saharan Africa and the Americas. He also teaches Health and Human Rights each year.

GLOBEMED UCHICAGO

WINTER '19

GLOBAL PARTNERSHIPS

We have been developing M&E protocols for Tiasamale, Yeep, and GoGirls. With the help of Comms, we finalized lesson plans on loans, contraceptives, and nutrition for those living with HIV and sent them to DIN. We began developing monitoring and evaluation strategies. With the help of Local Partnerships, we began developing surveys to be administered at DIN's community groups. We will continue to develop these next quarter, as well as work on planning this summer's GROW trip.

COMMUNICATIONS

Comms has been focused on **collaborative** projects. With Global Partnerships, we produced and sent 3 **lesson plans** for DIN Malawi's Youth Employment Empowerment Program to be used as teaching materials to encourage youth entrepreneurship. With Campaigns, we marketed **Global Getdown**, our chapter's largest event of the year, to bring a wider community discussion of health and public service to our campus.

RESEARCH & EDUC

GHU started the quarter by finishing up our nutrition curriculum and bringing in guest speaker Wendy Zeldin from the 61st St. Farmer's Market. We focused on developing internal projects, including revamping the GlobeMed library, creating the new GlobeMed Weekly Newsletter. We are also continuing to move forward with individual research projects within our team. Finally, we are gearing up to start the fall quarter curriculum which will be centered around health and migration.

CAMPAIGNS

Our key focus of this quarter was planning Global Getdown to engage the community with a broad range of topics relating to interdisciplinary public health work. The team organized logistics, speakers, auction items, and marketing in collaboration with the Comms team. We also raised \$2000 to send to DIN Malawi through our partnership with Kaplan, and our goals for next quarter include meeting the final \$1000 of our fundraising goal. In addition, we hope to work with other RSOs to host educational events.

INTERNAL DEV

Internal Development has had a full quarter! Some of the things accomplished this quarter were the creation of the Internship and Skills database, hosting the morning call with DIN, and forming connections with other chapters at events such as The Windy City Retreat. We hope to strengthen our presence in the chapter next quarter through more bonding events such as regular library study sessions, collaboration with other RSOs, and the hosting of the first ID led awareness campaign. We're excited for the things ahead!

LOCAL PARTNERSHIPS

This quarter was both rewarding and exciting for the Local Partnerships team! We solidified a partnership with a great organization, Options for Youth. After having a few meetings with the Options for Youth team, we have started to develop plans for next quarter. As of right now, we plan to help our partner with social media and research.
